

## The Teen Basket

### **Purpose:**

This activity introduces a child to the conventional names and the quantities of 11-19 using the bead materials.

### **Directions:**

For this activity you will need a work mat, a short bead stair, and nine 10-bead bars. Arrange the 10-bars and the short bead stair on the right of the work mat. Vertically place one 10-bar on the top left of the work mat. Line the red 1-bead with the 10-bar. Say to the child "When we have one 10 and add 1 unit we have eleven. This is eleven. What do we have?" Continue with the rest of the numbers.

### **Extensions:**

Placing visual and/or written numbers with their according beads.  
Colour/draw the number of according beads on the bead's sheet.
